

Guido Weischedel

Guido Weischedel (Graduate Electronics Engineer, born 1959) worked for a major automotive supplier in the software and hardware development of electronic engine control units before establishing his own company named ESM Software in 1987. ESM Software focused on the distribution of tools for software developers including tools like PVCS and StarTeam for software configuration management.

Guido has written several articles and one book on configuration management. He is a well-known speaker on conferences and is CM2 Professional certified.

He began teaching CM2 courses in the German language in 1998. His company ESM Software was renamed to GfKM in 1999. GfKM began offering public CM2 courses in most of Europe in 2004.

Based on more than 30 years of practical experience in Configuration Management and by providing CM2 trainings to hundreds of students he is the lead instructor and lead assessor of the European CM2 initiative. Guido has trained people from all types of industry in Configuration Management (CM2) around the globe in countries like Germany, UK, The Netherlands, Canada, Sweden, Thailand, South Korea, Spain, Italy, Finland, Norway, Etc.

In addition to trainings Guido has executed several process assessments in organizations to help them with process improvement initiatives.

In 2018 the company name got changed from GfKM to IpX Europe - The Institute for Process Excellence (www.ipxeu.com).
